Compare

NimbleSchedule stands out with its extensive selection of scheduling features. You can easily and quickly create full 24-hour shifts for your employees. The application can be accessed anywhere there is internet connection, which gives managers the freedom to access, approve and change the schedule throughout the day no matter where they are. There is a NimbleSchedule app available on Google Play, which makes it even easier for managers to work on the schedule while they are away from the office.

Click to Enlarge This online schedule maker provides all of the features and tools that we love to see in this type of application. Managers can set an unlimited number of departments and positions in the software. They can also import, export and manage all employee information.

When you use NimbleSchedule, the number of employees the application lets you assign shifts to depends upon the pricing package you choose. Packages are available for up to 75 employees. If you have more than 75 employees, you can create a custom package, and there is no limit to the number of employees you can include in that package.

Managers can easily approve time-off requests and vacation time. They can create an open shift, where anyone can sign up to work, which is ideal for on-call shifts. Employees can swap and bid on shifts within the application, which then alerts managers for approval.

One of our favorite features of NimbleSchedule is the ability to sync the schedule to Facebook. Employees can log into Facebook to view their upcoming hours. This scheduling software also syncs with Microsoft Outlook and Google Calendar. In addition, you can set NimbleSchedule to send your employees text message and email notifications alerting them of an upcoming shift.

One new addition to NimbleSchedule is a built-in time clock. Employees can easily log in to NimbleSchedule to clock in and out of their shifts. With the time clock feature integrated directly into this application, managers can see who is at work, as well as the time each employee arrives and when they leave.

### Reporting: 9.1/10

Compare

NimbleSchedule does an excellent job organizing data to help improve the functionality of your business. This employee scheduling software does not offer as many reporting options as several similar products, but it still provides a handful of options to keep track of your company's workforce.

Click to Enlarge

This online scheduling software helps you track your employees, and the number of scheduled hours, shifts, labor costs and payroll information. You can create reports and then export them using this application. Additionally, there are several ways to view the reports, including graphs, charts and boxes, which we found to be a welcomed feature that makes viewing statistics much easier to comprehend.

### Ease of Use: 9.4/10

Compare

As we mentioned previously, NimbleSchedule is one of the easiest scheduling applications we tested. The interface is straightforward, and we found it very easy to find the features and tools we wanted. All of the main capabilities of this online schedule maker are located along the top of the interface for quick and easy access. Additionally,

there are links located along the bottom of the interface that take you directly to the current day's schedule and availability.

Setting up NimbleSchedule is also simple and stress free. Many similar programs have you endure several menus and require you to enter an extensive amount of information before you can get going with the program. With NimbleSchedule, you will be creating schedules in just a few minutes. You can import employee information using Microsoft Excel and add shifts with just a click of the mouse. This application also features drag-and-drop capabilities that make rearranging and adjusting schedules less of a hassle.

## Help & Support: 10/10

Even though NimbleSchedule is so easy to use, there are several support resources available in case you run into any problems. Video tutorials are available on the NimbleSchedule website to assist you with certain features of the application. There is also a knowledgebase on the website to help you gather additional information about the program.

Click to Enlarge

If you want to speak to a NimbleSchedule representative directly, email, telephone and live chat support are available. This scheduling software offers 24-hour email support, along with 12-hour telephone support, so no matter when you are working, someone is always available to answer your questions and provide assistance.

## Summary:

NimbleSchedule is powerful employee scheduling software. There are plenty of features to help you schedule and manage employees' time efficiently. The ability to sync schedules to Facebook and other applications is a welcomed feature. Also, this scheduling software does not offer as many reporting options as several similar products. However, we found very little to complain about with NimbleSchedule, and we highly recommend this employee scheduling software.
